

# NITRO Studio for Dedicated Azure – Prerequisites

Updated February 7, 2022

The following items need to be in place in Azure to support NITRO Studio with Dedicated Azure

## Prerequisites:

- Azure Subscription
- An Administrator account with access to both the Microsoft 365 tenant and Azure tenant.

## NITRO will need the following components in Azure:

### SQL Server and Databases:

- Standard S1: 20 DTUs or Standard S0: 10 DTUs

### App Service Plans:

- S1 and P1v2

### App Configuration:

- Standard Version

Virtual machine and related components like disk, network interface, IP etc. OS should support IIS:

- Standard E2 v3
- Windows Server OS or Windows 10 OS
  - 80 GB Hard Disk
  - 16 GB Ram
