

PURCHASE REQUESTS

The best comprehensive solution used by organizations around the world!

REPLACE PAPER WITH A SEAMLESS ELECTRONIC APPROVAL SYSTEM

The Purchase Request system puts Crow Canyon's unique NITRO application service layer to work managing requests and workflows. Easily replace any paper request/voucher system and greatly improve speed and accountability.

How does it work? Requests for purchases are created. Approvers and approval levels are defined and workflows instituted. Email notifications keep those who need to know informed, preventing any requests from falling through the cracks.

From creation to completion, the Purchase Request system tracks and records all approvals, status, and activity. Records are saved for later analysis. Using advanced permissions, the system prevents unauthorized users from handling requests.

This system can be easily customized to meet your exact workflow and approval needs, including integration with financial software.

Clients who use this application:

City of Fargo, North Dakota

Covered California

NTT Data

Platinum Equity Investments

NITRO Applications are built for integration with Office 365, Teams & SharePoint. These applications...

...drive productivity and efficiency at organizations around the world.

...are practical tools that solve real business problems.

Crow Canyon's goal is to engage users, streamline operations, and power continuous improvement with its applications, including:

Request Manager

HR Requests

IT Help Desk

STREAMLINE YOUR PROCESS FROM BEGINNING TO END

Working in conjunction with the Purchase Request system, the Purchase Order system allows for easy customization to match your purchase process and to replace paper forms.

Set predefined approvers based on the cost, department, category, some combination of the above, or all of the above. Advanced reporting makes managing budgets a breeze by easily viewing total costs by department or category.

PART OF CROW CANYON'S FAMILY OF BUSINESS PROCESS AUTOMATION TOOLS

Incredible ROI: Built on Microsoft SharePoint, Crow Canyon Software is quick to deploy, easy to use, and low cost. ROI is a matter of weeks.

High User Acceptance: Because it is built upon Microsoft SharePoint, the user interface is familiar and easy to access.

Automate Service Tracking: Track and automate requests for IT services. Requests can be made via SharePoint, web, or phone.

Improve Service, Lower Costs, Raise Productivity: Chaotic emails drain productivity and increase employee frustration. Eliminate manual processes. Automate request processing across your organization.

Track All Types of Services: IT Support Requests, New Equipment Requests, Password Resets, On-boarding, Server Moves, Upgrades and Patches, and many more...
