

EQUIPMENT TRACKING

The best comprehensive solution used by organizations around the world!

TRACKING & MAINTAINING EQUIPMENT IS A CHALLENGE

You could be losing money, spending more than you need to, or using staff for record-keeping and research when they could be deployed more productively.

Missing inventory could be invisible for months. You could be duplicating equipment, overbuying, or spending on maintenance agreements for equipment you're not using. Repairs are more frequent than they should be because regular maintenance schedules aren't being kept. Equipment warranty, contract, lease and maintenance information isn't readily available.

Answering these questions and more:

- Who is using the equipment?
- Was regular preventative maintenance done?
- Where is the equipment located?
- What is the cost of the maintenance?
- What is the equipment usage history?

Clients who use this application:

Chestnut Health Systems

Detour Gold

Gold Coast Health Plan

J.V. Manufacturing Co., Inc.

NITRO Applications are built for integration with Office 365, Teams & SharePoint. These applications...
